3:45— 4:30PM

INFRASTRUCTURE PROTECTION APPLICATION/SUMMARY

Dr. David McIntyre,
Former Director of the Integrative Center for Homeland Security
Texas A&M University

-DESCRIPTIONS OF PRESENTATIONS PROVIDED ON BACK PAGE-

SESSION OUTLINES

Critical Infrastructure Key Resources Interdependency and Vulnerabilities

Presented by Clyde Miller, Director, Corporate Security

BASF Corporation

The Cross Sector Council conducted a study providing an avenue for data collection and analysis, while demonstrating an understanding of the functional priorities and areas of focus for critical infrastructure sectors in an all-hazards environment. By identifying potential points of failure and critical system dependencies, the study provided the opportunity to enhance regional and local emergency response planning and emergency management operations, while generating lessons learned that inform national preparedness strategies.

SmartGrid Integration, Interoperability, and Methodologies

Presented by Dr. Mladen Kezunovic, Director, Power System Control and Protection Laboratory

Texas A&M University

Dr. Kezunovic will provide an overview of research and field deployment implications of Smart Grid technology. He will explain system integration, interoperability, and methodology development for this cutting edge industry.

Advanced Persistent Threat

Presented by Eric Smithmier, Special Agent

Federal Bureau of Investigation

Special Agent Eric Smithmier will provide an FBI Cyber Program overview and provide background on Computer Intrusion issues to include the affect of Advanced Persistent Threat actors and their activities on the Oil & Gas/Energy Sector.

Industrial Control Systems Security/ SCADA

Presented by Eric Cornelius, Control Systems Security Program

DHS Office of Cybersecurity and Communications

Mr. Eric Cornelius will provide an applied overview of computer security issues pertaining to Industrial Control/SCADA Systems.

Infrastructure Protection Application/Summary

Presented by Dr. David McIntyre, Former Director of the Integrative Center for Homeland Security

Texas A&M University

Dr. McIntyre will summarize the day's events and provide an overview of the most important takeaways for the Critical Infrastructure Key Asset Owner or Operators in attendance.
